In every case of conflict between these sources the latest one published shall take precedence. The online Modern Roses database is the most up to date ARS publication and takes precedence over all other publications. The following is the list of official ARS publications listing Approved Exhibition Names: Modern Roses, Official List of Approved Exhibition Names for Exhibitors & Judges, Handbook for Selecting Roses, Recent Registrations on the ARS website, and the online Modern Roses database. In cases where a variety is not listed in any of the above official ARS publications, the Combined Rose List (CRL) or Help Me Find (HMF) may be used as a reference.
- This is an alphabetical show. With the exception of classes specifying multiple varieties, all roses in each class will be placed alphabetically and each variety in each class shall constitute a separate class to be judged separately.
- Containers will be furnished by the Tulsa Rose Society unless noted.

Additional explanation can be found in Chapter 4 of the ARS Guidelines and Rules for Judging.
- Wedges and supports are permitted. An entry may be penalized if wedging material extends above the top of the vase according to its degree of distraction.

- No exhibits can be removed prior to the closing of the show. Keeper trophies may be taken following the Judges' Luncheon.
- Exhibitors must place their challenge class entries in Horticulture.
- During judging, only judges, clerks, and necessary show personnel will be allowed in the show area.
- Neither the Tulsa Rose Society nor Tulsa Garden Center will be responsible for the loss or damage to any property, nor for injury to persons. Liability of any nature is disclaimed.

## **EARTH-KIND ROSES**

Earth-Kind is a special designation given to select rose cultivars by the Texas AgriLife Extension Service through the Earth-Kind landscaping program. It is based on the results of extensive research and field trials and is awarded only to those roses demonstrating superior pest tolerance, combined with outstanding landscape performance.

Earth-Kind roses do well in a variety of soil types, ranging from well-drained acid sands to poorly aerated, highly alkaline clays. Once established, these select cultivars also have excellent heat and drought tolerance.

The use of Earth-Kind roses provides the opportunity to enjoy these wonderful flowering plants while limiting the use of fertilizers, pesticides, and water. These sustainable practices are excellent examples of how Earth-Kind landscaping is working to preserve and protect our natural resources and the environment.
